## **CXT Software Reports Financial Results for Fiscal 2008**

Phoenix, AZ – February 20, 2008 – CXT Software, a leading-edge provider of same-day and expedited delivery software is pleased to report a 23% year-over-year increase in revenue for its fiscal year ended December 31, 2008. This is CXT Software's eighth consecutive year of double-digit revenue growth since the company was founded in 1999 and began selling its products in 2000.

A significant portion of CXT Software's 2008 sales growth can be attributed to increasing market share in the Route and Distribution sectors of same-day transportation, primarily to the health care, pharmaceutical, office supply, retail and auto parts industries. Companies in these industries rely heavily on electronic communication of data directly between their enterprise systems and X Dispatch servers. In 2008, CXT Software significantly improved the ability of its X Dispatch product to integrate with various enterprise databases. Also contributing to sales growth is an increasing number of X Mobile applications being deployed for bar code scanning, signature capture, dynamic distribution and general tracking of packages and vehicles.

CXT Software products are very well positioned in the market to provide exceptional value to its customers. “With the downturn in the current economy many delivery company owners seek out ways to create efficiencies and reduce cost. Investing in appropriate technology provides these benefits,” commented Dan Calderone, Founder of CXT Software. “I think customers realize that long-term success depends on partnering with the right technology companies. We are committed to the continual enhancement of our software products allowing new and existing customers to be more competitive and profitable.”
